ON TOP OF THE WORLD!

Nicosia, 2nd April 2013

We are very pleased to announce that our unique AHT electric underfloor heating system has been chosen and will be installed later this week in offices at the Eiffel Tower in Paris. We would like to congratulate Mr Jerome Lafranchi and his Neptune Energie team for their great achievement and thank them for their hard work, continuous support and steadfast belief in AHT. As Jerome tongue-in-cheek commented “After the Eiffel Tower, our next projects will be Buckingham Palace, the Acropolis, the Pyramids and the White House!” All we can say is pourquoi pas?
